Hear From The Experts

Composition:

Melanostatine-5, Tyrostat, B-White.

Know your Product:

Melanostatine - 5: Reverses pigmentation process ensuring lighter skin tone and luminous glow
Melanostatine - 5 is derived from α -MSH as a biomimetic peptide that ensures a better control over the skin tone by effectively blocking melanin synthesis. The stimulation of melanocytes is led by α -MSH accompanies structural modification of the skin cells. The ingredient reverses the pigmentation process to lead the way for a more controlled skin tone. It is known to lighten the skin significantly within a week's usage, reverse pigmentation without toxicity, is stable and easy to work with. Melanostatine - 5 is widely used in skincare products to achieve benefits like skin illumination, age spots' correction, skin tone equalizer and lightning care.

Tyrostat

Tyrostat: Limits melanin production and tackles age spots
Tyrostat is a strong inhibitor of the tyrosinase enzymatic activity. This is one of the main enzymes that are involved in the pigmentation process that come without the risk of any side effects. The ingredient limits melanin production and skin reddening by reducing skin pigmentation and erythema. This not only ensures an even skin tone but also exhibits outstanding results when it comes to reducing the appearance of age spots and an overall lightening of the skin.

B - White

B - White: Fights pigmentation, lightens and whitens the skin
B - White is known to decrease tyrosinase activity and melanin synthesis thereby reducing overall skin pigmentation and inducing a potent skin lightening effect. By decreasing both constitutive and facultative pathways, it also reduces the appearance of pigmented dark spots ensuring a more uniform complexion. Promising a progressive brightening effects, it is an indispensable ingredient when it comes to assuring a bright and even-toned skin.

Benefits

1. Suitable for use by all genders
2. Prevents aging around the eyes
3. Protects the delicate under eye skin
4. Suitable for all skin types
